More Than Words®

A Parent's Guide to Building Interaction and Language Skills for
Children with Autism Spectrum Disorder or Social Communication Difficulties

An invaluable resource for both parents and professionals, *More Than Words* offers practical, research-based strategies to promote the social and communication development of young children with autism spectrum disorder or other social communication difficulties. By translating the research into a user-friendly approach, this step-by-step Hanen guidebook shows parents how to turn everyday conversations and activities with their child into rich opportunities for building social interaction and communication.

Each chapter contains guidelines for how to apply the strategies with children who are not yet talking, as well as with those who use words or short sentences.

Through the help of this guidebook, parents learn how to:

- Improve two-way interaction with their child
- Promote conventional ways of communicating
- Encourage better social communication
- Increase the child's understanding of language

About the Author

Fern Sussman is a speech-language pathologist and clinical program director at The Hanen Centre, a Canadian nonprofit charitable organization recognized worldwide for its outstanding, evidenced-based early language intervention programs and resource materials. Drawing on her extensive experience in working with families of young children on the autism spectrum, Ms. Sussman has authored two guidebooks for parents, *More Than Words*® and *TalkAbility*™: *People Skills for Verbal Children on the Autism Spectrum – A Guide for Parents*. In addition, she has developed two Hanen Programs for parents by the same names. These parent-implemented early language intervention programs are offered by Hanen-trained speech-language pathologists around the world. Ms. Sussman has devoted her career to giving parents the knowledge and skills to become their children's very best language facilitators.

"More Than Words is a 'must-have' reference for parents of children with ASD, and for professionals supporting parents. More Than Words addresses the very specific challenges posed by children with ASD, using strategies drawn from and based on the Hanen Program, an empirically validated, child-centered developmental approach to supporting children's communication development."

Barry M. Prizant, Ph.D., CCC-SLP, Director, Childhood Communication Services, Cranston, RI.
Adjunct Professor, Brown University Center for the Study of Human Development

"I have learned more from this material than any other book I have read on autism and it has helped me understand my child immensely."

Veronica Rodriguez, Parent
